

# Learning 2

# Tailwind CSS & Javascript ES6

```

    sortBy = sortByOrganization ? study.lead_organization === filterByOrg : true
    filterStatus = filterByStatus ? study.status === filterByStatus : true
    return (study) {
      sortByOrganization
      filterStatus
    }
  }
}

```

```
function filterStudies({ studies, filterByOrg
• • • • •
  filteredStudies = studies.filter(study
  return filteredStudies
}
```

# Tailwind CSS

*Utility-first CSS framework*

Google Developer Group  
Universitas Sriwijaya

# Utility-First Concept

- Satu class
- Styling langsung di *HTML*

```
<h1 class="text-3xl font-bold underline">  
  Hello world!  
</h1>
```

# Core Utilities

- layout
- sizing
- spacing
- typography
- color

# Pseudo Class Utilities

- hover
- focus
- active
- disabled
- focus-within
- group & group-hover

# Responsive Design

Breakpoint prefix	Minimum width	CSS
<code>`sm`</code>	40rem (640px)	<code>`@media (width &gt;= 40rem) { ... }`</code>
<code>`md`</code>	48rem (768px)	<code>`@media (width &gt;= 48rem) { ... }`</code>
<code>`lg`</code>	64rem (1024px)	<code>`@media (width &gt;= 64rem) { ... }`</code>
<code>`xl`</code>	80rem (1280px)	<code>`@media (width &gt;= 80rem) { ... }`</code>
<code>`2xl`</code>	96rem (1536px)	<code>`@media (width &gt;= 96rem) { ... }`</code>

# JavaScript ES6

*Modern JavaScript for React*

Universitas Sriwijaya

# Let & Const

- **let** → dapat berubah
- **const** → *tidak berubah*

```
const name = "Ello"
```

# Arrow Function

```
const greet = () => {}
```

# Destructuring

Mengambil data dari object atau array

```
const { name } = {name: "ello", age: 20}  
const [angka1, angka2] = [1, 2, 3]
```

# Spread & Rest Operator

**Spread** → Menyebarkan

**Rest** → Sisa

```
const a = [1, 2];  
const b = [3, 4];
```

```
const gabung = [...a, ...b];
```

Spread

```
const user = {  
  name: "Ello",  
  age: 20,  
  role: "admin"  
};
```

```
const { role, ...profile } = user;
```

Rest

# Default Parameter

```
const perkalian = (x, y = 2) => {  
  return x * y  
}
```

# for...of

```
const fruits = ["Apple", "Banana", "Orange"];  
for (const fruit of fruits) {  
  console.log(fruit);  
}
```

# Template Literals

```
const name = "Ello";
```

```
const text = `Halo ${name}`;
```

# Promise & Async/Await

```
const janji = new Promise((resolve, reject) => {  
  const sukses = false;  
  
  if (sukses) {  
    resolve("Berhasil!");  
  } else {  
    reject("Gagal!");  
  }  
});  
  
const jalankanJanji = async () => {  
  try {  
    const hasil = await janji;  
    console.log(hasil);  
  } catch (error) {  
    console.log(error);  
  }  
};  
  
jalankanJanji();
```

# Array Methods

- map
- filter
- find
- slice
- splice
- reduce

```
array.map(item => itemBaru)
array.filter(item => kondisi)
array.find(item => kondisi)
array.slice(start, end)
array.splice(start, deleteCount, item)
array.reduce((acc, cur) => accBaru, initialValue)
```

# Challenge! (FE Member Only\*)

1. Refactor portofolio lama kamu dengan menggunakan *Tailwind CSS*
2. Minimal melakukan refactor satu section/page/components di portofolio
3. Bagi yang portofolio-nya sudah menggunakan *Tailwind CSS*, buatlah sebuah simple card yang berisi identitas kamu menggunakan *Tailwind CSS*
4. Kerjakan di repository portofolio lama atau buat di repository baru
5. Lakukan pull request ke Frontend Development GDGoC UNSRI 25/26 untuk memasukkan link repo github anda di folder /2-fundamentals/task.txt
